

# VALUE CREATION BY DISRUPTIVE INNOVATION

Nanopharm is creating value for our clients through disruptive innovation in respiratory product development.

**Nanopharm™ is the leading contract research organization in the OINDP space. We provide an integrated, one-stop solution for supporting pre-clinical development programs through to clinic, for established SMEs and emerging pharmaceutical companies.**

Our approach has enabled small and emerging pharmaceutical companies direct access to advanced scientific knowledge at a competitive fee-for-service arrangement.

“Nanopharm succeeded in making a formulation and process that was robust in a true Quality by Design manner. Our interaction with Nanopharm was both data and science driven, which was an optimum combination to deliver the most robust formulation by design.”

F.Vanhoutte, Scientific Director

## Business benefits

Nanopharm's disruptive approach has provided unique opportunities to our clients to build value and de-risk programs through innovation.

We have developed our SmartTrack™ service to provide specialized understanding for product development programs from discovery to IND. Moreover, SmartTrack has unlocked the pathway for Q3 structural equivalence and in silico modelling of clinical pharmacokinetics for OINDPs.

Our core competence has been to integrate product development through device engineering, materials characterization & formulation design. This has been further enhanced by our strategic alliance with Sciarra Laboratories (New York). Together, we offer the World's leading fully integrated CDMO for the development and GMP manufacture of MDIs.

## Benefit now!

Talk to us at RDD about how Nanopharm's innovative services can facilitate your OINDP developments.

Please follow us on twitter (@nanopharmtweets) and contact enquiries@nanopharm.co.uk to arrange a meeting with us.

## Nanopharm are attending events in 2019.

### RDD Europe 2019:

Nanopharm's Gonçalo Farias and William Ganley will present posters at RDD **read more.**

### InspireMe:

We will be co-hosting the InspireMe conference in southern San Francisco in June **read more.**

Please contact us for more information on how Nanopharm™ will innovate for you.
